

# PRACTICE 2030

A practice of 2030 will have **strong leadership** and a workforce that **strives for better ways of working** to achieve the vision of becoming a **high performing practice**.

Ideally these practices will have **strategic planning** in place, defining the direction they wish to pursue; and mechanisms guiding the implementation of the plan.

Our ultimate goal is **Sustainable change towards the practice of the future**.

Practices would have **connections** with other services and organisations in their community to ensure a smooth transition across all sectors of care **for better health outcomes for their patients**.

## WHY PRACTICES NEED TO CHANGE:

- ▶ My Health Record expansion
- ▶ meet current accreditation standards
- ▶ prepare for patient centred Health Care Homes model
- ▶ Quality Improvement Practice Incentive Payment

## WHAT PRACTICES NEED:

A practice of the future will have the right foundations supported by leaders who engage with their staff.

- ▶ brainstorming ideas as a team
- ▶ sharing learnings
- ▶ taking their whole practice along the journey
- ▶ meaningful vision and mission plan
- ▶ robust systems and processes which are regularly reviewed
- ▶ an understanding of quality improvement to implement change

2030

## HOW WE DID IT:
